THINGS WORK**

THE  
**HUBSCRUB**<sup>™</sup>  
COMPANY

# MORE THAN WHEELCHAIR CLEANING, A GREAT MULTI-PURPOSE SYSTEM

## MORE SUPPORT

**HUBSCRUB** offers premium support by using Internet to connect with our customer's system. It's like having a **HUBSCRUB** technician at your door step. Life time support. We have been doing this over 15 years.

## MORE MOBILITY

**HUBSCRUB** is built to move. It's why service businesses have been using **HUBSCRUB**. Moving **HUBSCRUB** to where equipment is located in a facility is the most cost effective and efficient. Frequency of cleaning increases with convenience.

## MORE DISINFECTION CHOICES

Infection prevention is a priority! Pathogens are becoming more resistant to current disinfectants. New infection prevention products are constantly being developed. **HUBSCRUB** is programmable to anticipate change. UV, Concentrates, Ready To Use, Tablets, new dilutions ratios, dwell times, misting. The useful life of a product must be able to accommodate change.

## MORE EFFICIENCY

In 7 minutes, equipment is cleaned, rinsed and disinfected at sporicidal level. A rotating wrap around spray system for multiple shape equipment with higher spray pressures for more effective, deeper and faster cleaning results. All done with only 4 gallons of water for a complete cycle.

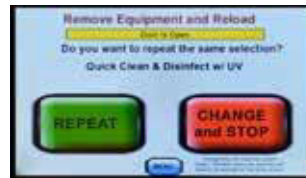

## MORE INFO

Touchscreen simplicity

- Mgt. reports on system useage
- Displays functions in progress
- Select clean and disinfection choices
- Maintenance reminders
- Explanations of errors to assist the user... And so much more.

Just press Repeat for the next piece of equipment.

**HUBSCRUB** provides the means to lock in Clean and Disinfection cycles. Nice feature for employee turnover and volunteers.

## MORE DESIGN

**HUBSCRUB** offers a range of technologies to meet and exceed your expectations for cleaning and disinfection.

USB PDF data can be loaded through our USB port. Training, Maintenance and Repair topics right at your fingertips.

Misting Spray System – when using a RTU Disinfectant, a misting spray is used along with an air moving system to maximize equipment surface coverage.

Video when you need to see how something is actually done.

Tablets/RTU – when you need to save on costs for Disinfection but still need high level disinfection, **HUBSCRUB** disinfectant cycles are less than 3 cents.

UV only selection to disinfect non-washable mobile equipment or previously cleaned equipment. **A BIG PLUS.**

System self maintenance – **HUBSCRUB** can take care of itself. Automatic cleaning to purge chemical tubing lines, devices and filters so chemical residue doesn't build up. Features that keep production up and running at maximum performance.

## MORE BUSINESS BENEFITS

- BETTER USE OF RESOURCES
- OVER 50% LABOR SAVINGS
- DISINFECTION DONE RIGHT
- MULTIPLE EQUIPMENT TYPES
- SIMPLE OPERATIONS
- BUSINESS OPPORTUNITY
- FASTER AND BETTER CLEANING
